November 27, 2002

Sir:

In response to the Office Action dated August 27, 2002, please amend this application  
as follows:

IN THE CLAIMS:

Please amend claim 17 as follows:

17. A tangible medium storing a plurality of program instructions, said program  
instructions when executed by a processor causing a network device to read data from a  
remote memory of a remote device directly to a local memory of a local device by:  
sending a message from said local device to said remote device, said message  
including a transport header indicating the message type of said message;
